A 3D diagram of a cubic lattice structure. The vertical axis is labeled Y with an upward arrow. The horizontal axis is labeled C with a rightward arrow. A diagonal axis is labeled M with an arrow pointing towards the top-right. The lattice consists of a cube with internal lines and dots. The front face has dots at the corners and midpoints of the edges. The top face has dots at the corners. The back face has dots at the corners. Dashed lines represent hidden edges of the cube. A diagonal line runs from the bottom-left-front corner to the top-right-back corner.
